Profile

Looking for a challenging role in a company to utilize my engineering skills that can contribute to the company's growth as well as enhance my knowledge by exploring new things.

Education

MLR INSTITUTE OF TECHNOLOGY — Hyderabad, TS
Bachelor of Engineering — 2021 2025
Major in Electronics and Communication;
Cumulative GPA: 6.51 /10

NARAYANA JUNIOR COLLEGE — Hyderabad, TS
Intermediate- MPC-92.4% — 2019 - 2021

TVR MODEL HIGH SCHOOL — Hyderabad, TS
Secondary Education (SSC)-8.8 — 2018 - 2019

Projects

Hazard Detection and Response Robot

- Designed a Hazard Detection and Response Robot by using DHT11,MQ2 sensors.It is used in environments to enhance safety in hazardous environments through a reliable robotic system.
- An ESP32-CAM for real-time video streaming. Controlled via the Arduino Bluetooth Control app.
- This project highlights the potential for automation and smart robotics to enhance safety, detect and respond to any of the potential dangers, offering a scalable approach to addressing challenges in safety-critical environment

Enhancing Steganography Security

- Designed a dual-layer approach with LSB and AES using Python.Its goal is to hide the data and ensure security to data by strong encryption keys.

Experience

Devtown (Jan-Apr 2025), Bengaluru

Zomato Landing Page Clone

- Developed a project that replicates the main elements and layout of the landing page of the Zomato website, built with HTML, CSS, and React.JS for the front end.Express.js and Node.js are used for the back end; use the MongoDB database.
- It includes user login, restaurants, order tracking, payment, and ratings as Zomato Home Page.

Book Record Application

- Designed and developed a web application that is used to manage a library of books that is built with HTML, CSS, and JS for the frontend and Node.js and Java for the backend and uses MySQL and MongoDB databases.
- It helps.updating, adding, and deleting and helps users to manage books in libraries

Tasky Application

- Developed a web application for managing tasks built with HTML, CSS, React.JS, or Angular and Node.JS, Express.js, and used a PostgreSQL database.
- It helps users to create, edit, track, and upload tasks.

Certifications

NPTEL-Digital Design with Verilog, IIT Guwahati

- Certified for course completion.

Technical Skills

Programming Languages: HTML,CSS,NODE.JS,EXPRESS.JS,REACT.JS,MATLAB,Verilog,C Programming,Java
Developer Tools: VS Code
Technologies/Frameworks:GitHub
Operating System:Windows

Additional

Languages: Fluent in Telugu, Hindi, and English.
Personality traits: Communication ,Creativity, Professionalism
